

Aanjaney Sharma

B.Tech in Computer Science Engineering(specialisation in Data Science and Analysis)
aanjaneysharma39@gmail.com | +916358741476 | [LinkedIn](#) | [GitHub](#)

Summary

Aspiring software engineer aiming to leverage strong foundations in Data Structures, OOP, and web development to grow professionally and add value to dynamic teams.

Education

Bachelor of Technology in Computer Science Engineering (with specialisation in Data Science and Analysis),
2023-2027, DIT University, Dehradun, Uttarakhand
CGPA: 8.12

Intermediate (CBSE) | 2022-2023 - 84.8% | Gail D.A.V. Public School

Matriculation (CBSE) | 2020-2021 - 91% | Gail D.A.V. Public School

Skills

Programming languages: Python, HTML5, CSS3, JavaScript, Java

Web Development Technologies: ReactJs, Node.js, Express, Tailwind, MongoDB, EJS, Bcrypt, JWT

Development Tools: Git, Github, Postman API, MongoDB Atlas, MongoDB Compass

Design and Creation Tools: Adobe Premiere Pro, Blender 3D, Adobe Photoshop

Projects/Portfolio

- **VibeOn Music Player** | HTML5, CSS3, Javascript, Node.js, Express, ReactJs
 - Engineered a responsive full-stack music streaming platform featuring custom audio streaming logic, secure user authentication, and dynamic state management.
 - Implemented dynamic state management and full CRUD operations to allow seamless user account creation and playlist management.
- **Job Application Portal** | HTML5, CSS3, JavaScript, ReactJS, Node.js, Express, MongoDB
 - Developed a full-stack, responsive job application portal using React and Tailwind CSS, integrating a MongoDB backend to handle complex user data.
 - Built an analytical dashboard interface tracking application metrics, including dynamic "jobs applied" counters and status indicators (accepted/rejected).
 - Created secure endpoints for users to post jobs, submit applications, and fetch/render candidate resumes seamlessly.
- **Customer Sentiment Analysis model** | Python, Scikit-learn, NumPy, Pandas, Seaborn
 - Built and trained an NLP pipeline to classify user sentiment using an Amazon Alexa reviews dataset containing thousands of consumer entries.
 - Executed comprehensive data preprocessing, including tokenization, stop-word removal, and text vectorization using Scikit-learn.
 - Evaluated multiple classification models to optimize accuracy, tracking metrics like precision, recall, and F1-score to ensure robust model performance.

Certifications

- **Database Management Essentials** – *University of Colorado Boulder (Coursera)* | SQL, Relational Databases, ER Modeling
- **Linux Fundamentals**: *LearnQuest (via Coursera)* | Linux Commands, file systems, permissions, shell basics

Co-Curriculars

- **Content Creation & Video Editing Head** – *Unstop Igniters Club, DITU*
- **Social Media Head** – *IEEE Student Branch, DIT University*
- **Technical & Web Development Team Member** – *Annual Techno-Cultural Fest*
- **Participant** – *Cognizance / Technical Fest, IIT Roorkee*

Personal Information

Gender: Male

Marital Status: Single

Current Address: DIT University, Dehradun

Date of Birth: 09/05/2005

Known Languages: English, Hindi
